

AI Visibility Audit

Comprehensive Analysis & Strategic Roadmap

January 13, 2026

Executive Summary

We analyzed Ark Roofer across 20 high-intent AI prompts on ChatGPT and Google AI for Roofer in Georgetown, TX. Ark Roofer scored 20/100 overall, with 0% visibility on ChatGPT and 40% visibility on Google AI; when it did appear, sentiment was positive. This indicates Ark Roofer is largely absent from AI-driven recommendations—especially on ChatGPT—limiting share of voice and lead capture from AI search despite favorable perception when surfaced.

⚠️ Primary Issue Detected

AI models lack sufficient data about your brand. When users ask recommendation queries, AI cannot find structured comparisons to validate your authority, defaulting to competitors who have this content.

 Simulated Prompt Log

We simulated the following user queries to test brand presence across AI platforms.

How to read this: These are generic questions users might ask AI—your brand name is not included in the prompt. If AI doesn't recommend you here, it means you're invisible to organic AI-assisted discovery, even if AI knows about your brand when asked directly.
